4" Submersible Motor Water Cooled, 2 Wire, Single Phase
Motores Sumergibles de 4" en Agua, Monofásicos de 2 Hilos

Single Phase, 2 Wire Motors / Motores Monofásicos de 2 Hilos

Four inch, asynchronous, two pole submersible motor, made in AISI 304 stainless steel for parts in contact with water. Cooling and lubrication of the thrust bearing assembly and carbon brushes is provided by a mixture of water and glycol. Squirrel-cage rotor mounted on Kingsbury self-centering thrust bearing. Stator housed in an airtight stainless steel casing (canned-type) with both flanges and shell in AISI 304L stainless steel. Motor lead connection allows for fast and easy maintenance. Motor suitable for use with variable frequency drive (30Hz – 60Hz). The capacitor is placed in the Noryl cartridge directly connected to the motor, so the motor does not require an external control box. Thermal protection included in the motor.

Motor eléctrico asíncrono de dos polos sumergible, los componentes en contacto con el agua están contruados en acero inoxidable AISI 304. La lubricación y el enfriamiento del sistema de empuje axial están garantizados por una solución de agua y glicol. El rotor está apoyado sobre un grupo de empuje axial sobre patines de tipo Kingsbury diseñado para soportar cargas axiales. El estator está alojado dentro de una camisa en acero inoxidable AISI 304L sellada herméticamente por bridas contruadas con el mismo material. Usan cable con conector rápido. El motor se puede utilizar con variadores de velocidad (30Hz-60Hz). El motor es monofásico y lleva capacitor incluido, montado en un cartucho hermético de Noryl en la parte inferior del motor. Protección térmica incluida.

TECHNICAL SPECIFICATION / CARACTERISTICAS TECNICAS

| | |
|-------------------------------------|--------------------------|
| Flange | NEMA 4" |
| Bridas | |
| Insulation Class | F |
| Clase de aislamiento | |
| Type of protection | IP68 |
| Grado de protección | |
| Cooling flow | min. 0.2 m/s / 0,66 ft/s |
| Velocidad de refrigeración | |
| Voltage tolerance | +6% / -10% |
| Tolerancia alimentación | |
| Max. starts recommended | 20/h |
| No. máximo de arranques recomendado | |
| Max. operation depth | 300 m / 984 feet |
| Profundidad máxima de ejercicio | |
| Horizontal operation | 0,5 HP - 1,5 HP |
| Funcionamiento horizontal | |

Shafts with end part made of stainless steel AISI 304 with a special process of surface hardening and polishing of the working area of the brushes. Squirrel-cage rotor made in aluminum.

Eje en AISI 304 especialmente mecanizado para asegurar la máxima resistencia mecánica.
Rotor jaula de ardilla en aluminio.

Kingsbury type thrust bearing unit consisting of tilting pads made of highly-resistant stainless steel and machined using the spherical lapping process.

From 0,5 HP to 1,5 HP: 2000N
(3000N in the 1,5 HP 60Hz version)

Grupo de empuje axial de tipo Kingsbury, sobre patines oscilantes en acero inoxidable de alta resistencia producidos a través de un proceso de lapeado.

De 0,5 HP hasta 1,5 HP: 2000N
(3000N en versión 1,5 HP 60Hz)
