Description	Part No.																										
Switch & Governor†	.667	N/A																									
Switch & Terminal Board‡		137122A																									
Governor only††	.667	N/A																									
Capacitor	25 MFD	136656																									
	200 MFD	135884																									
	282 MFD	135885																									
	324 MFD	135886																									
Overload protector		136123																									
		136124																									
		136125																									
		136126																									
		136127																									
		136128																									
		136129																									
Bearing & Housing		135309																									
Bearing, Front		022962																									
Bearing, Rear		022962																									
Combination Bracket, front		135314																									
		136137																									
Bracket, Front		134930																									
Bracket, Rear		136115																									
Thru Bolts (4)	5-3/4"	136116																									
	6"	136117																									
	6-1/2"	134512																									
	7"	134513																									
	7-5/8"	136118																									
8-1/8"	134515																										
Access Cover, rear		021301R																									
Access Cover, Screws (2)		021302																									

NOTE: Capacitor cover 132539 is utilized on 3HP single phase motors.

(‡) To replace the switch on motors with a date code prior to Nov. 1993, use switch 129218.

(††) To replace the governor on motors with a date code prior to Nov. 1993, use switch & governor kit 137336. (Both the switch and governor must be changed).

(†) To replace both the switch and governor, use switch & governor kit 137336. This kit applies to all 94 series motors regardless of date code. To replace the terminal board on motors with a date code prior to Nov. 1993, use switch & governor kit 137336.
